

BP SHOVELS

BP Shovel is designed to clear and clean snow or other waste from driveways, paths, walkways, pavements, parks and other critical areas following especially heavy snowfall. It is manufactured from amorphous thermoplastic, which makes it a very efficient tool. The shape and size of this snow shovel is very useful when you have to take care of a larger piece of land. It has proved to be a good choice at some harder pieces of work. It is resistant to low temperatures (from -100 to +135 degrees Celsius).

The handle is made from eucalyptus wood material, which is characterized by high strength, toughness, resistance to weather conditions and it is very lightweight.

The shovel is produced in three different types:

- BP shovel
- BP shovel for cars
- BP shovel with long handle

Product technical data

Type	BP shovel
Material	Thermoplastic
Dimensions (L x W)	1350 x 430 [mm]
Weight S1	1450 [g]
Operating temperature	- 100 - +135 [°C]
Color of shovel	RAL system
Impact resistance	Yes
Order code	BP-GPR-000429
Full product name	BP Shovel

BP SNOW SHOVELS

Product technical data

Type	BP shovel with long handle
Material	Thermoplastic
Dimensions (L x W)	1350 x 270 [mm]
Weight S ₁	1100 [g]
Operating temperature	- 100 - +135 [°C]
Color of shovel	RAL system
Impact resistance	Yes
Order code	BP-GPR-000436
Full product name	BP shovel with long handle

Product technical data

Type	BP Snow shovel
Material	Thermoplastic
Dimensions (L x W)	830 x 270 [mm]
Weight S ₁	900 [g]
Operating temperature	- 100 - +135 [°C]
Color of shovel	RAL system
Impact resistance	Yes
Order code	BP-GPR-000434
Full product name	BP Snow Shovel
